PROJECTED CASH FLOWS
Poor Business Idea Inc. - Unrealistic Projections

Financial Projections Overview

We expect to make a lot of money. These projections are estimates based on our assumptions.

We have not validated these numbers. They are rough estimates.

Year 1 Projections

Revenue: $500,000. We are not sure how we will achieve this but we think it is possible.

Expenses: $100,000. We have not calculated this in detail. These are rough estimates.

Net Profit: $400,000. This seems reasonable to us.

Year 2-5 Projections

We expect revenue to grow each year. We are not sure by how much but it will grow.

By year 5, we expect to be making millions. We are confident this will happen.

Assumptions

We assume everything will go well. We assume customers will buy our product.

We assume we can execute our plan. We assume market conditions will be favorable.

These assumptions are optimistic. We have not validated them with data.

Funding Requirements

We are requesting $200,000 which is above the $20k-$150k range. We need this much to start.

We will use the funds for various expenses. We have not broken down the costs in detail.
